

CLEAR SPRINGS 345KV TRANSMISSION CIRCUIT LINE CONSTRUCTION

In March 2010, the Lower Colorado River Authority ("LCRA") (one of the largest wholesale power utilities in Texas) contracted Irby to construct the Clear Springs to Hutto Transmission Line. The project scope consisted of 88 miles of 345kV new transmission line construction with approximately 160 circuit miles of bundled conductor on lattice towers and steel poles.

Irby executed the project to schedule with assistance from fellow Quanta Services (PWR:NYSE) subsidiary company Can-Fer Utility Services, a specialist in the construction of electrical and substation infrastructures including foundations and directional
