

# THE SOUTHERN LOOP 345KV TRANSMISSION LINE CONSTRUCTION PROJECT

Vermont Transco owns and manages Vermont's high-voltage electric transmission system (115 kV and above) and provides service to Vermont's 17 electric distribution utilities and utilities in New Hampshire and New England.

In October 2010, Vermont Transco contracted Cianbro Construction to build 53 miles of 345kV transmission line including the relocation of existing 345kV and 115kV interconnection line as part of the Southern Loop transmission line project.

As subcontracted to Cianbro Construction the Irby work scope included the direct embed of wood H-frame structures, steel
